

LINERIO PANELS. WALL WITH DEPTH

Linerio slat panels give the interior a unique character. They can play the role of the main decoration, the quiet hero in the background or help to designate different zones in the interior.

Linerio panels are available in three widths and several colors, thanks to which we gain a lot of freedom of arrangement.

KEY FEATURES

EASY INSTALLATION

The installation is quick and easy. Panels are installed with adhesive and can be easily cut to the desired size using a saw or jigsaw.

EASY TO KEEP CLEAN

Can be cleaned easily with a damp cloth and mild detergent.

IMPROVE SOUNDPROOFING

Thanks to the material they are made of and their spatial structure, the panels soundproof the interior and eliminate reverberation and echo in large rooms

WATERPROOF

Panels can be installed as well in interiors with increased humidity, on condition they don't have direct contact with water.

LOW WEIGHT

Linerio panels are made of polystyrene. This makes them light, which means that the transport and mounting of the product are very easy.

RECYCLABLE

Linerio panels are made of fully recyclable material.

PRACTICAL MATERIAL

Linerio panels owe their unique properties to the material from which they are made. To manufacture the panels, we use polystyrene covered with a print made by hot-stamping. Polystyrene is a modern material that is 100% recyclable. It is lightweight, durable, and easy to clean. This means that Linerio can be installed even in more demanding areas, such as the hallway, work area, or the kitchen.

AVAILABLE SHAPES

Linerio panels come in three lines S, M and L, which differ in the width and depth of the slats.

INSPIRATIONS

A large, light grey sectional sofa with a textured fabric finish, positioned against a wall with vertical slats. The sofa has three main sections and a chaise longue on the right side.

A black coffee table with two round tops and thin white legs. The table is set with a black wire basket, a small vase with dried flowers, a mug, and a book.

A black side table with a thin metal frame, holding a black lamp with a white shade and a vase with dried branches.

A large, white, spherical pendant light hanging from a black metal frame. The frame consists of two horizontal bars, one above and one below the sphere.

A floor lamp with a black metal frame and two white, spherical shades. One shade is positioned high and the other is lower, both on adjustable arms.

A large, rectangular, textured rug in a dark, earthy tone, covering most of the floor area in front of the sofa.

A small, dark, oval-shaped mirror mounted on the wall to the left of the sofa.

A dark, woven basket containing a piece of dried, textured material, possibly a plant or a decorative object, located on the floor to the right of the sofa.

INSTALLATION ADVANTAGES

- Quick installation – easy cut using a saw or jigsaw
- Choice of mounting options - vertically, horizontally, diagonally.
- Does not require additional substrate preparation work (e.g. priming) as well as protecting the top layer (e.g. grouting)
- Clean installation, no dust
- Immediate 3D effect on the wall after installation - the rooms can be used immediately
