RIGIO. EXCELLENT DESIGN

- The perfect reproduction of the colour and structure of wood and concrete, the two-stage application of the varnish and the matt finish make Rigio naturally beautiful. Thanks to special embossing technology and the use of 4 side painted bevel, the wood-like panels resemble authentic boards even more.

RIGIO. WHAT CAN THIS FLOOR DO?

- WATER-RESISTANCE: the rigid core floor can even be laid in the bathroom! Direct contact with water and high humidity levels do not affect its parameters.
- DIMENSIONAL AND COLOUR STABILITY: the rigid core and fibreglass layers guarantee dimensional stability regardless of the ambient temperature, and the UV resistant decorative layers – a colour that will not change over the years
- DURABILITY: resistance to impact, scratches and other mechanical damage unprecedented in any floor category.

RIGIO. WHAT CAN THIS FLOOR DO?

- STAIN RESISTANCE: Rigio is resistant to substances that can cause permanent staining, and is easy to clean.
- THERMAL COMFORT: Walking barefoot on this floor is a pleasant experience. It can also easily and conveniently be used for playing on – the materials it is made of are warm to the touch. And if you need more heat, you can make your dream of underfloor heating come true thanks to Rigio's low heat resistance.
- INSTALLATION WITHOUT EXPANSION JOINTS: allows you to lay a uniform floor throughout the house.
