

SYSTEM SOLID SOLID AS BRICK AND STONE

SOLID FACADE PANELS ARE INSPIRED BY NATURAL MATERIALS, WHICH HAVE BEEN USED FOR CENTURIES ON THE FACADES OF BUILDINGS.

LIGHTWEIGHT AND DURABLE PANELS ALLOW THE FAST CHANGE OF ANY BUILDING WITHOUT WORRYING ABOUT THROUGHOUT ITS LIFETIME.

COLLECTIONS

BRICK

SANDSTONE

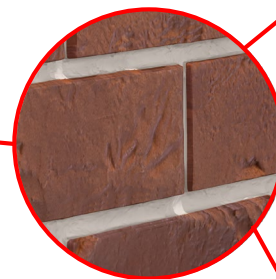

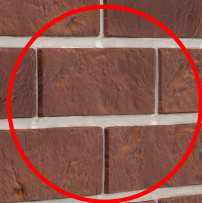

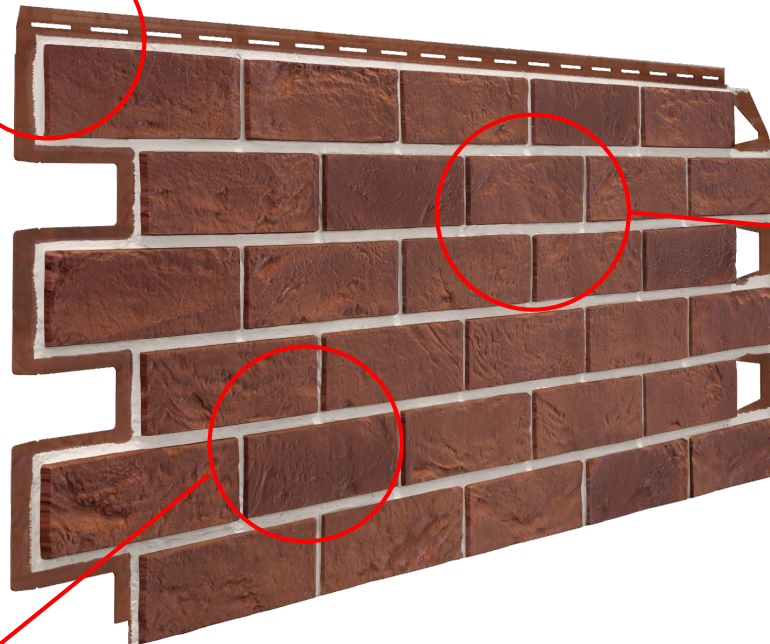

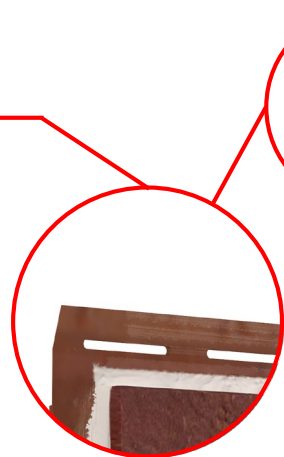

STONE

SYSTEM SOLID - CHARACTERISTIC

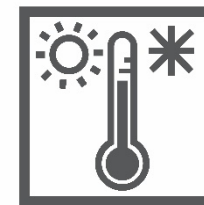

Easy installation

Ideal imitation
of natural materials

Resistant to changing
wether conditions

Resistent to
mechanical damage

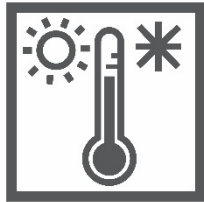

AESTHETIC

- aesthetic and natural appearance of the facade, which mimics the natural equivalent - the pattern on the panel is repeated every 11 panel
- decors inspired by traditional European architecture
- the facade does not fade, flake, sink and does not absorb water

NO MAINTENANCE REQUIRED

- resistant to mechanical damage
- resistant to pests
- completely waterproof [does not absorb water, does not swell, does not require sealing]
- resistant to changing weather conditions
- a durable solution without the need for additional maintenance or painting
- simple cleaning with a pressure washer

FACADE PROTECTED FOR LONG YEARS

- perfect cover of facade insulation
- correctly installed panels ensures proper ventilation
- lightweight panels do not burden the facade
- 30 years warranty

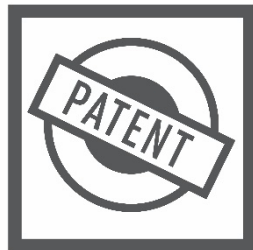

QUICK AND EASY ASSEMBLY

- large covering area of panels
- perfectly matched finishing elements
- material is easy to process
- does not require the use of specialized tools
- does not require the use of so called „wet construction works“ as in case brick and stone

PATENTED SOLUTION

- innovation confirmed with patent - UNIVERSAL TRIM
- patent pending No. Pat. Apl. No PL.402931

SOLID SANDSTONE

SANDSTONE CLASSIC

This panel imitates a wall made of hewn sandstone. Distinctive, geometric texture of the surface and calm colors are suitable for arranging both modern and rustic buildings.

012 Light Grey

013 Beige

014 Cream

015 Light Brown

016 Dark Brown

Colors of finishing trims FS-252 and FS-262 are matched to the panel colors:
CREAM, BEIGE, LIGHT BROWN, LIGHT GREY – trims in light color
DARK BROWN – trims in dark colors

SOLID BRICK

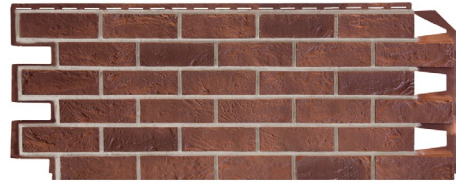

PERFECT BRICKS AND JOINTS

This panel imitates a brick wall by accurately shaded patterns and colors of bricks and joints. The effect is completed by precise finishing.

011 Bristol

012 Dorset

013 Exeter

014 York

015 Coventry

Colors of finishing trims FS-252 and FS-262 are matched to the joint between bricks:
DORSET – trims in white color
BRISTOL, YORK – trims in light color
EXETER, COVENTRY – trims in dark color

SOLID STONE

COUNTRY STYLE

Structure of panels imitates a wall made of slate.
Colors ranging from light grey, through beige to
dark brown graphite will satisfy every taste.

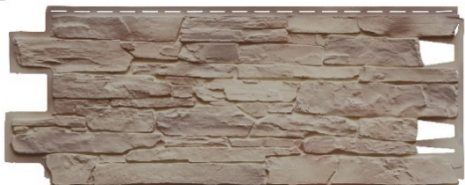

011 Lazio

012 Liguria

013 Calabria

014 Umbria

015 Toscana

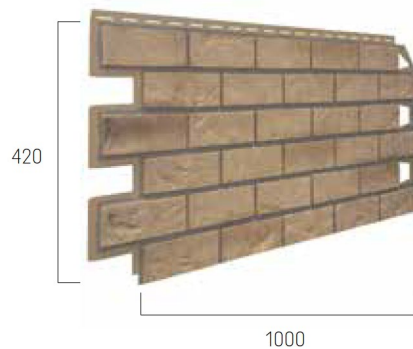

016 Sicily

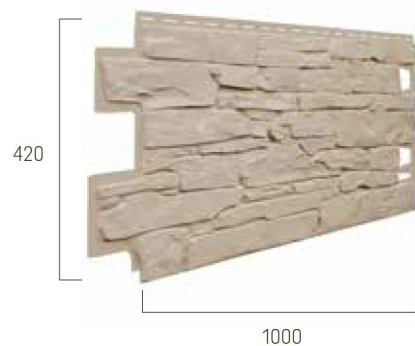

Colors of finishing trims FS-252 and FS-262 are matched to the panel colors:
CALABRIA, UMBRIA, LAZIO, LIGURIA – trims in light color
TOSCANA, SICILY – trims in dark colors

FS.262 ventilation trim

CONNECTING WITH OTHER SYSTEMS

- thanks to the universal strip, SOLID boards can be combined with other facade systems manufactured by VOX
- Solid panels can also be combined with other types of facade materials

SOLID SYSTEM

- SYSTEM SOLID facade panels are one of the most interesting VOX facade solutions
- Aesthetics and functionality are the result of a complex production process
- Well thought out technical solutions (locks, universal trim) translate into usability
- Simplicity and no special requirements when it comes to assembly

INJECTION ELEMENTS

- For the production are used copolymers - mixtures of different raw materials
- Copolymers provide high stiffness, impact strength and limited linear expansion

PAINTS

- Paints are applied by painting robots
- Paint control algorithms provide the naturalness (uniqueness) of the pattern
- In order to best reproduce the natural material in the case of the BRICK series, the joints are also painted
- The addition of silicon makes the product in touch and visually close to its natural prototype

COMPATIBILITY

- SOLID SYSTEM may be combined with other VOX facade systems
